Confused about what the date labels on food packages mean?

Here's what you should know:

BEST IF USED BY

You'll see a date on the label of most packaged foods.

- Labels often include phrases like "Use by" or "Best if used by," but may only have a date. Other than infant formula, date labels are not required by federal law on packaged foods.
- Manufacturers often apply a date to inform consumers and retailers when the food will be at its best quality. Food packages may also have a date to indicate when the food was produced or packed.

SELL BY

Avoid wasting food

- Don't just rely on the date label that appears on a package. Look at and smell the food for signs of spoilage to know if it is ok to eat. Toss it if the color, consistency, or texture has changed.
- If the label recommends eating the food within a certain number of days after opening the package, eat it before that window closes.

USE BY

Extending shelf life

- Freezing is a good option for extending the shelf life of many packaged foods. Use the **USDA's FoodKeeper App** for information on how to safely store different foods to maximize freshness and quality.
