TASK 1 (5 marks)

Read the instructions carefully and write an email of 60-70 words.

Your Irish friend Nick is planning on moving to the Canary Islands and has asked you for some advice about housing options. You have found this information about coliving and cohousing which you think can help him. Send him an email **explaining** the main ideas to Nick.

Coliving or Cohousing?

COLIVING is a new concept of communal living popular with millennials who live and work on their businesses under the same roof.

When **COHOUSING**, however, residents usually own their individual homes, which are clustered around a “common house” with shared amenities.

Space and design

The coliving model has more communal spaces than cohousing so that residents can get together.

Convenience

Coliving arrangements offer more and a greater variety of services than cohousing, such as co-working areas, etc.

Length of stay

Coliving is designed for short stays while cohousing is intended to provide permanent homes.

Location

Coliving is geared toward cities, while cohousing seeks more contact with nature.

Demographic

Coliving creates very specific communities, while cohousing admits a greater diversity of people.

Age

Coliving is for thirty-somethings while cohousing is for older people, families and groups with similar interests.

MODELO DE ACTUACIÓN

Hi Nick!

First, coliving is for coworkers in their thirties. It has common working areas for those who prefer the city for a while. However, cohousing allows you to be freer since the shared spaces are not so open. You'll be with different types of residents who enjoy the country and share interests. Best thing, you can be there for as long as you need!
